Benefits for the health professionals

A flexible and scalable solution

- + Easy to deploy and use
- + Protocols and contents tailored to each patient
- + Unique solution for a multi pathological monitoring: chronic renal insufficiency, follow-up of oncology, follow-up of transplant, follow-up of wounds, respiratory insufficiency...
- + Interoperability with connected devices and business softwares.

A simplified coordination

- + Proactivity in decision-making
- + Information sharing among stakeholders
- + Traceability of acts
- + Time saving by anticipating schedules.

And for the health centers?

- + Simple solution, interoperable and easily integrated into the IS
- + Efficiency in the organization of medical care
- + Compliance with standards.
