

# The collaborative e-health platform

**Share. Cooperate. Optimise**

PRODUCT DEVELOPED BY

# Welcome to the social media network for health care professionals.

With MEDICALSPACE, a true collaborative platform dedicated to health care professionals, you can rapidly contact a colleague, obtain a document about a patient, share information or take part in a chat group easily and in complete security.

Cooperation with medical authorities guarantees the security and confidentiality of data which are hosted by a Ministry-approved medical data hosting service provider.

## Medicalspace is accessible via PC, tablet and smartphone

### Guarantees of our Tools

IS integration with enovacom

Medical data hosting

No resale of data

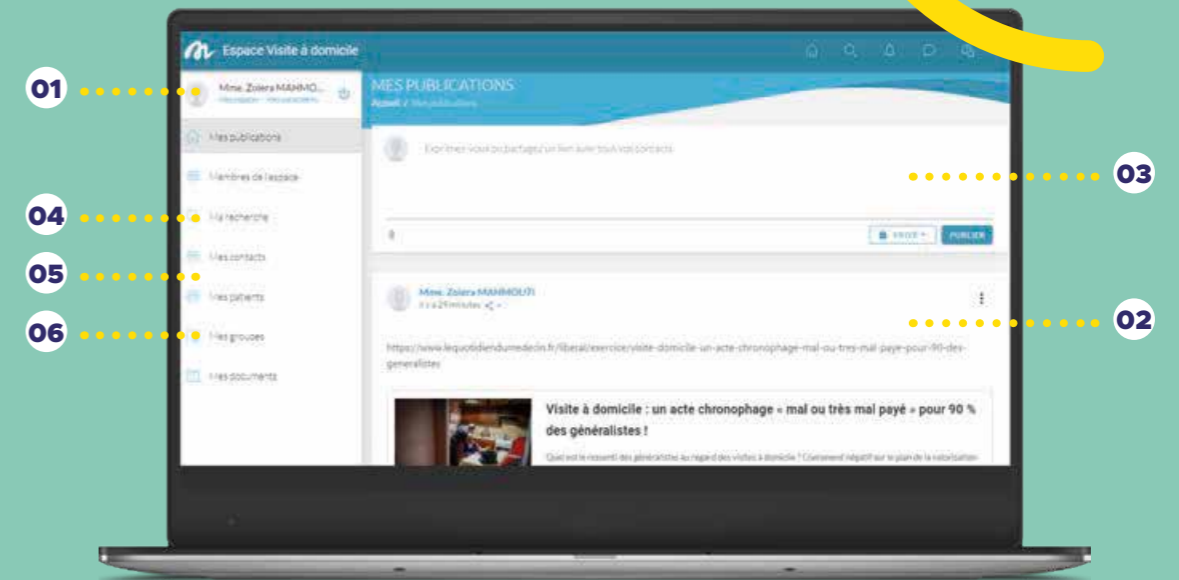

Upgradability

GDPR Certification

## Features

MEDICALSPACE is a social media network, open to all health care professionals and designed to foster interaction and information sharing.

### Sections 01

You use different sections, defined by your organisation's administrator, as collaborative and customisable platforms with the possibility of activating specific features (remote consultation, link with specialised software, etc.).

### Directory 04

Using various criteria, you can search for health care professionals, your patients and groups and access their contact details and related data.

### Instant Messaging 02

You can use the application to communicate directly with one or more contacts simultaneously. You can send text messages, photos, videos and sound recordings, etc.

### Contacts and patients 05

You can centralise phone calls and emails to your contacts and patients, and synchronise your telephone (text messages, notifications, management of calls and voice mail, file transfers).

### Posts 03

You view the news feed from your network, which fosters interaction and dissemination of different types of content.

### Groups 06

You can communicate with private groups, accessible by invitation, on chosen topics or about a patient.

# A service from Tmm Software, creator of smart, safe, innovative e-health applications

Every day, health care professionals work with patients to offer them the **best possible care**.

To assist them in their mission, Tmm Software is full of ideas... and **smart digital tools to share**.

Our tools include collaborative platforms, online appointment scheduling, management of emergency care duties, etc. Adapted to new ways of working and 100% digital and secure, our collaborative solutions facilitate information sharing, organisation of coordinated care and patient follow-up.
